

COAM

CAPRYLHYDROXAM ACID

Formula

C₈H₁₇NO₂

Mol weight

159.23 g/mol

Structural formula

Specification: RL-C 2001/01

Description: white to cream coloured crystals

Identity: practically identical with reference spectrum
IR-spectrum:

Melting point 78.0 – 81.0 °C

Colour number: max. 30 APHA

Assay min. 98 %

Synonyms

CAS Description:	N-hydroxyoctanamide
CAS No.:	[7377-03-9]
EINECS-No.:	230-936-7
TSCA:	not listed
German:	Caprylhydroxamsäure

Specific Requirements

The above chemical substance was registered in accordance with the REACH regulation 1272/2008/EC. The assigned registration number is 02-2120787685-34-0000.
