

Confirmation Carbon Footprint

IfEA Institut für Energieausweis GmbH hereby confirms that the company:

ESIM Chemicals GmbH

St.-Peter-Strasse 25
4020 Linz
Österreich

has a

carbon footprint of 85.661 tonnes of CO₂ equivalent

in the calendar year 2023, in accordance with the standards of the Greenhouse Gas Protocol and with reference to EN ISO 14064-1.

The calculation includes:

Scope 1: Direct emissions from the company's own sources.

Scope 2: Indirect emissions from purchased energy.

Scope 3: Other indirect emissions from the upstream and downstream value chain, excluding product-specific emissions from downstream actors.

Product-specific emissions were excluded because the manufactured intermediate products are supplied to customers, who account for these emissions as part of their own reporting. This approach avoids double counting and complies with the principles of the GHG Protocol.

IfEA Institut für Energieausweis GmbH confirms the accurate calculation of emissions based on the data provided, in compliance with the requirements of the GHG Protocol.

Note: IfEA Institut für Energieausweis GmbH accepts no liability for the accuracy of the initial data provided by the company. The detailed lists and calculations are available in the greenhouse gas report.

Linz, 20. 12. 2024
